DATA ON INLAND FLEET AND LOADING [redacted] pp; German; [redacted]

25X1A

Date of distribution: 28 July 52; [redacted]

25X1A

25X1X

The document consists of 6 forms (12 pages) of typewritten material containing three DSU (Central German Office for Water Transport and Transshipping) Loading Reports and three DSU Inland Fleet Operations Reports. The loading reports are dated 31 January 1952, 15 February 1952 and 29 February 1952. The Fleet Operation Reports are dated 30 January 1952, 16 February 1952 and 29 February 1952.

The document is similar to the one abstracted under [redacted] on 14 March 1952 which covered different dates.

FID Abstract [REDACTED]

Production of T-2 Type Television Sets in Sachsenwerk, [REDACTED]

25X1A

25X1A [REDACTED]

Annex 1 is a plan for the 1952 production of television receivers at the Sachsenwerk, Radeberg plant indicating a total of 10,600 planned repairs and rechecks of old receivers, and a planned production of 45,000 new receivers.

Annex 2 is a letter by D. S. Kheyfts [sic], Chief Designer of the T-2 Television Receiver. Analyst's note: presumably identical with D. Kheyfets, coauthor of article "The Television Set T-2 Leningrad", in Radio No 9, 1951, giving some comments on observations made at the Plant No 616 concerning checks of T-2 sets produced by the SAG "Kabel" and shipped to the USSR. In the conclusions it points out that defects were due to careless workmanship, lack of careful checks, and poor quality of parts. It stresses the inadmissibility of continued shipments to the USSR of sets containing such defects. Immediate steps to improve the production and checking methods at the SAG "Kabel" plant are held imperative.

Annex 3 contains data on the work performed by the Warranty Group on the T-2 sets delivered by the SAG "Kabel", as compiled by the Directorate of Workshops of the Leningrad TV Network, for the period 1 Sept to 15 Nov 1951. The main troubles, in order of frequency, encountered were (a) tube replacement (b) poor contacts, and (c) replacements of fixed capacitors.

Annexes 4 - 10 are comments by Fomin, General Manager of the SAG "Kabel" concerning reports of defects and measures taken to correct same.

Annex 11 is a plan, dated 29 Dec 1951 and endorsed by the General Mgr of the SAG "Kabel" Division, outlining organizational and technical measures for the improvement of the quality of the T-2 sets produced by the Sachsenwerk plant. It fixes responsibilities and deadlines.

Return to CIA Library

Annex 12 is a letter by the SAG "Kabel" HF Plant in Berlin-Oberschoenweide, to the General Mgr of the SAG "Kabel", dated 18 Jan 1952, concerning its tubes and kinescopes. It disclaims responsibility for defects in T-2 sets produced by the Sachsenwerk and containing "HF" tubes. Tube defects located following receiver production are held to be caused by rough handling in transit and inept installation at the Sachsenwerk plant. Direct responsibility for the quality of its tubes can be assumed only for direct shipments to the USSR.
